

The Marsh Bellofram Group of Companies
STRONGER TOGETHER

Making Your Business More Reliable, Efficient, and Safe

The Marsh Bellofram Group of Companies AT A GLANCE

From the heartland
to space ... and
everywhere in between.

Marsh Bellofram is a family of companies focused on instrumentation, precision controls, and elastomers. Products are organized and sold under fully dedicated divisions, each powered by experienced technical sales, applications engineering, and customer service support personnel. These divisions are united by the critical performance of their products, industry-leading lead times, and prompt shipping. Anywhere material needs to be moved, regulated, pressurized, protected, or insulated, we are there. Each day, the average American comes in contact with dozens of our products. To that American, we proudly say—with decades of engineering excellence informing our manufacturing—you can rely on our performance.

Oil and Gas

- BelGAS
- BelGAS CP
- BelGAS FM
- WNS-Lowery
- EZ Flow Control

Making Your Business More Reliable, Efficient, and Safe

BelGAS is a global leader in the design and manufacture of high- and low-pressure regulator products. It is the originator, with more than 40 years of proven market experience. As our first endeavor in the oil and gas industry, BelGAS has set the standard for success in all that has come after it. The standards of excellence, accuracy, and dependability forged at BelGAS have done more than set industry expectations—they have influenced generations of industry professionals, and for that we are most proud.

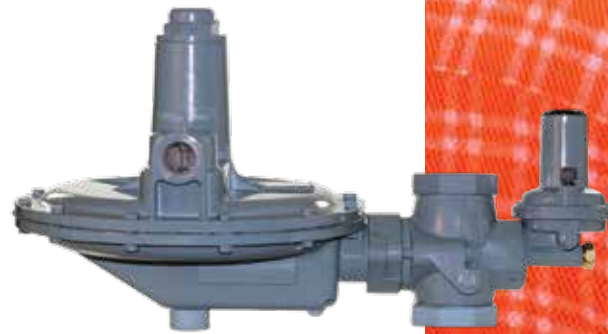

Applications

Natural Gas/Propane/Hydrogen
Transmission and Distribution:

- Municipal Gas Systems
- Local Distribution Companies (LDCs)
- Natural Gas Transmission Pipelines
- RNG/Biogas
- CNG
- LNG
- Hydrogen
- HVAC
- Plumbing
- Sub-Metering
- Boilers
- Power Generation
- OEM Gas Products
- Oil and Gas Markets

Products

- Gas Pressure Regulators
- Back Pressure Regulators
- Air/Gas Regulator Systems, Manifolds, Instruments
- Electronic Pressure Control
- Needle Valves

If pressure exceeds or falls below the adjustable set points, the PSX2 Over/Under Pressure Slam Shut Safety Device automatically shuts off the flow of gas.

Regulators for Oil and Gas Markets are provided for accurately supplying and maintaining crucial set pressures.

BelGAS CP is a manufacturer of Control Products strategically designed and engineered for the Oil and Gas Markets. With a wide variety of High and Low Pressure Control Valves, Liquid Level Controllers and Switches, Pilots, Temperature Controllers, etc., BelGAS CP furnishes dependable industry leading pneumatic, mechanical, electrical, and EPA approved devices.

Applications

Production Equipment at the Well Site:

- Separation
- Heater Treaters
- Compression
- Glycol Units
- EPA Meeting Standards

Products

- Control Valves
- Liquid Level Controls
- Back Pressure Regulators
- Temperature Controllers
- Non-Bleed Devices
- Pilots and Accessories

P7200, Control Valve

P5300, Back Pressure Regulator

P8100, Level Controller

P7100, Control Valve

BelGAS FM is the trusted name in flame management, improving safety with flame arrestors, tank venting accessories, burners, and specialty fabrication services. Our products are American made with nearly all components manufactured in-house, giving extraordinary quality control over each piece. Beyond products, BelGAS FM brings expertise in design and manufacture and an understanding of proper specification that is vital to helping protect life and equipment.

Products

- Flame Arrestors
- Tank Venting Accessories
- Burners
- Customer Logo Engraving
- Specialty Fabrication

Applications

Production Equipment for Flame Management:

- Heater Treaters
- Flares
- Burner Management
- Dehydration Units
- Amine Units
- Gas Production Units
- Combination Units
- Line Heaters

In-line Flame Arrestor

Burner

Flame Arrestor

WNS-Lowery brings together two trusted names, Whittle & Neher Systems and Lowery Wellheads.

WNS, founded in 1984, manufactures stainless steel, carbon steel, and ductile iron check valves and a full line of high-quality stuffing boxes, pumping and flowing tees, and cone packing. Lowery is known for its API Spec Q1-certified wellheads as well as flanges and bell nipples.

Applications

Rod Accessories and Wellheads:

- Well Sites
- Artificial Rod Lift
- Flow Back Prevention

Products

- Check Valves
- Cone Packing
- Fittings
- Stuffing Boxes
- Pumping and Flowing Tees
- 150 Blow-Out Preventer
- Back Pressure Regulator
- Seating Nipple
- Stuffing Boxes
- WNS Coat
- Ball Check Valves
- Series 20 Choke
- Polish Rod Clamps
- Wellheads
- Flanges
- Bell Nipples

WNS-Lowery offers a growing line of blow-out preventers (BOPs), used for well control and monitoring.

EZ FLOW CONTROL

Known for industry-standard choke assemblies, EZ Flow Control built its reputation on engineering and hands-on design experience. For flowing wells, EZ Flow Control provides field engineers with the flexibility they need to customize pressure to suit production requirements. This highly skilled team, located in the heart of America's oil country, has been setting the standard for decades.

Products

- Adjustable Chokes
- Positive Chokes
- Threaded/Flanged Connections
- Flow Beans
- Stems and Seats - both Carbide and Standard

Choke assemblies (from left, EN62, EFT108, EN60) are furnished with alloy and or harden steel stems and seats as standard trim for regular service or standard service, with Carbide options.

Applications

Production Chokes and Flowback Equipment:

- Wellheads
- Heater Treaters
- Frack and Flowback
- Truck Treaters

ATC Diversified Electronics is your source for the most reliable monitors, motor and pump protection, isolated switches, and alternating relay products. As a leader in solid-state control products, we pioneered the first phase monitor relay to protect 3-phase equipment from phase loss (single phasing), under voltage (brown-outs), and phase reversal (improper sequence). Our continued investment in R&D keeps pace with the needs of an evolving industrial marketplace.

Industries/Applications

- Motor and Pump Monitoring
- Water and Wastewater Plants
- Sewage Plants
- Booster Stations
- Grinders
- Irrigation Equipment
- Petrochemical
- Machine Tool
- Conveyors
- HVAC/R
- Elevators/Escalators
- Utilities
- Processing Equipment
- Agricultural Machinery
- Renewable Energy

Products

- Process Monitoring & Alerts
- Phase/Voltage Monitors
- Current Monitors
- Pumps and Level Controls
- Isolated Switches
- Time Delay Relays
- Power Alerts
- HVAC Products
- Seal Failure Alarms
- Sockets and Accessories

SLU Series Universal Phase Monitors provide cost-effective protection against premature equipment failure.

The ARM Series Alternating Relay is a microprocessor-based controller designed for use in dual load installations to assure equal run time on each load.

Product Highlight

SENSERT™ provides remote process monitoring and alerts — anywhere and anytime. The SENSERT ecosystem starts with the base unit which is connected to local sensors. The base unit receives data and pushes data using WiFi connection to the Amazon Web Services cloud. The data can be accessed on the SENSERT web portal or the SENSERT mobile app.

When timing is everything, process engineers and machine designers turn to ATC for their industrial timing and control requirements. These rugged, reliable products are accurate and repeatable in all types of industrial environments, including factory automation, food processing, plastics, packaging, water treatment, and many other OEM applications.

Industries

- Factory Automation
- Food Processing
- Plastics
- Packaging
- Water Treatment

Products

- Timers
- Time Delay Relays
- Panel Mount Digital Timers
- Counters
- Relays
- Timer/Relay Accessories
- TC/PID Controllers

365C long-ranger computing timer industry standard digital timer.

The Model 385AR 1/16 DIN Timer Counter is an accurate, 10-in-1 multi-function multi-range industrial timer/counter, offering the benefits of 10 unique operating modes within a single unit.

BELLOFRAM
PRECISION CONTROLS

Direct-acting, high-performance air-pressure regulators offer precision control, high accuracy, maximum stability, and large flow and exhaust capabilities to support even the most challenging applications. In addition, our pneumatic relays provide cost-effective, high-performance air regulation across a variety of applications and market requirements. Products are made for use in environments where high performance and accuracy are top priorities.

Industries

- Chemical and Petrochemical
- Petroleum Production
- Pipeline Transmission
- Electric Utilities
- Water and Wastewater Systems
- Pulp and Paper
- Textiles
- Semiconductors
- Food and Beverage
- Environmental Control Systems
- Construction Equipment
- Agricultural Equipment
- Machine Tool
- Material Handling
- Automotive Testing and Assembly
- Medical Equipment

Products

- Precision Air Pressure Regulators
- Pneumatic (Air) Relays
- Electronic Pressure Transducers
- Servo Pressure Controllers
- Diaphragm Air Cylinders
- Filter Regulator Lubricators
- Accessories and Add-Ons

Electro-pneumatic transducers are used to convert current or voltage input signals to proportional output pressures.

Bellofram Elastomers, the combination of legendary names Bellofram Diaphragm and Bellofram Silicones, is the single access point for the world of frictionless and leak-proof rolling diaphragm seals and silicone sponge, rubber sponge, solid silicone, and solid rubber products. We offer precision manufacturing, custom material formulations, and unmatched institutional knowledge of applications. Our engineers work in partnership with your product design engineers to develop a solution just right for your needs. Nothing we do is off the shelf.

Bellofram DIAPHRAGM DIVISION

Inventor of the original rolling diaphragm in 1950, we continue to lead in the manufacture of frictionless and leak-proof rolling seals that handle pressures, temperatures, and stroke lengths over an extremely wide range.

Products

- Class 4 Diaphragms
- Class 4C Diaphragms
- Class 3 Diaphragms
- Class 3C Diaphragms
- Class 1A Diaphragms
- Class 1B Diaphragms

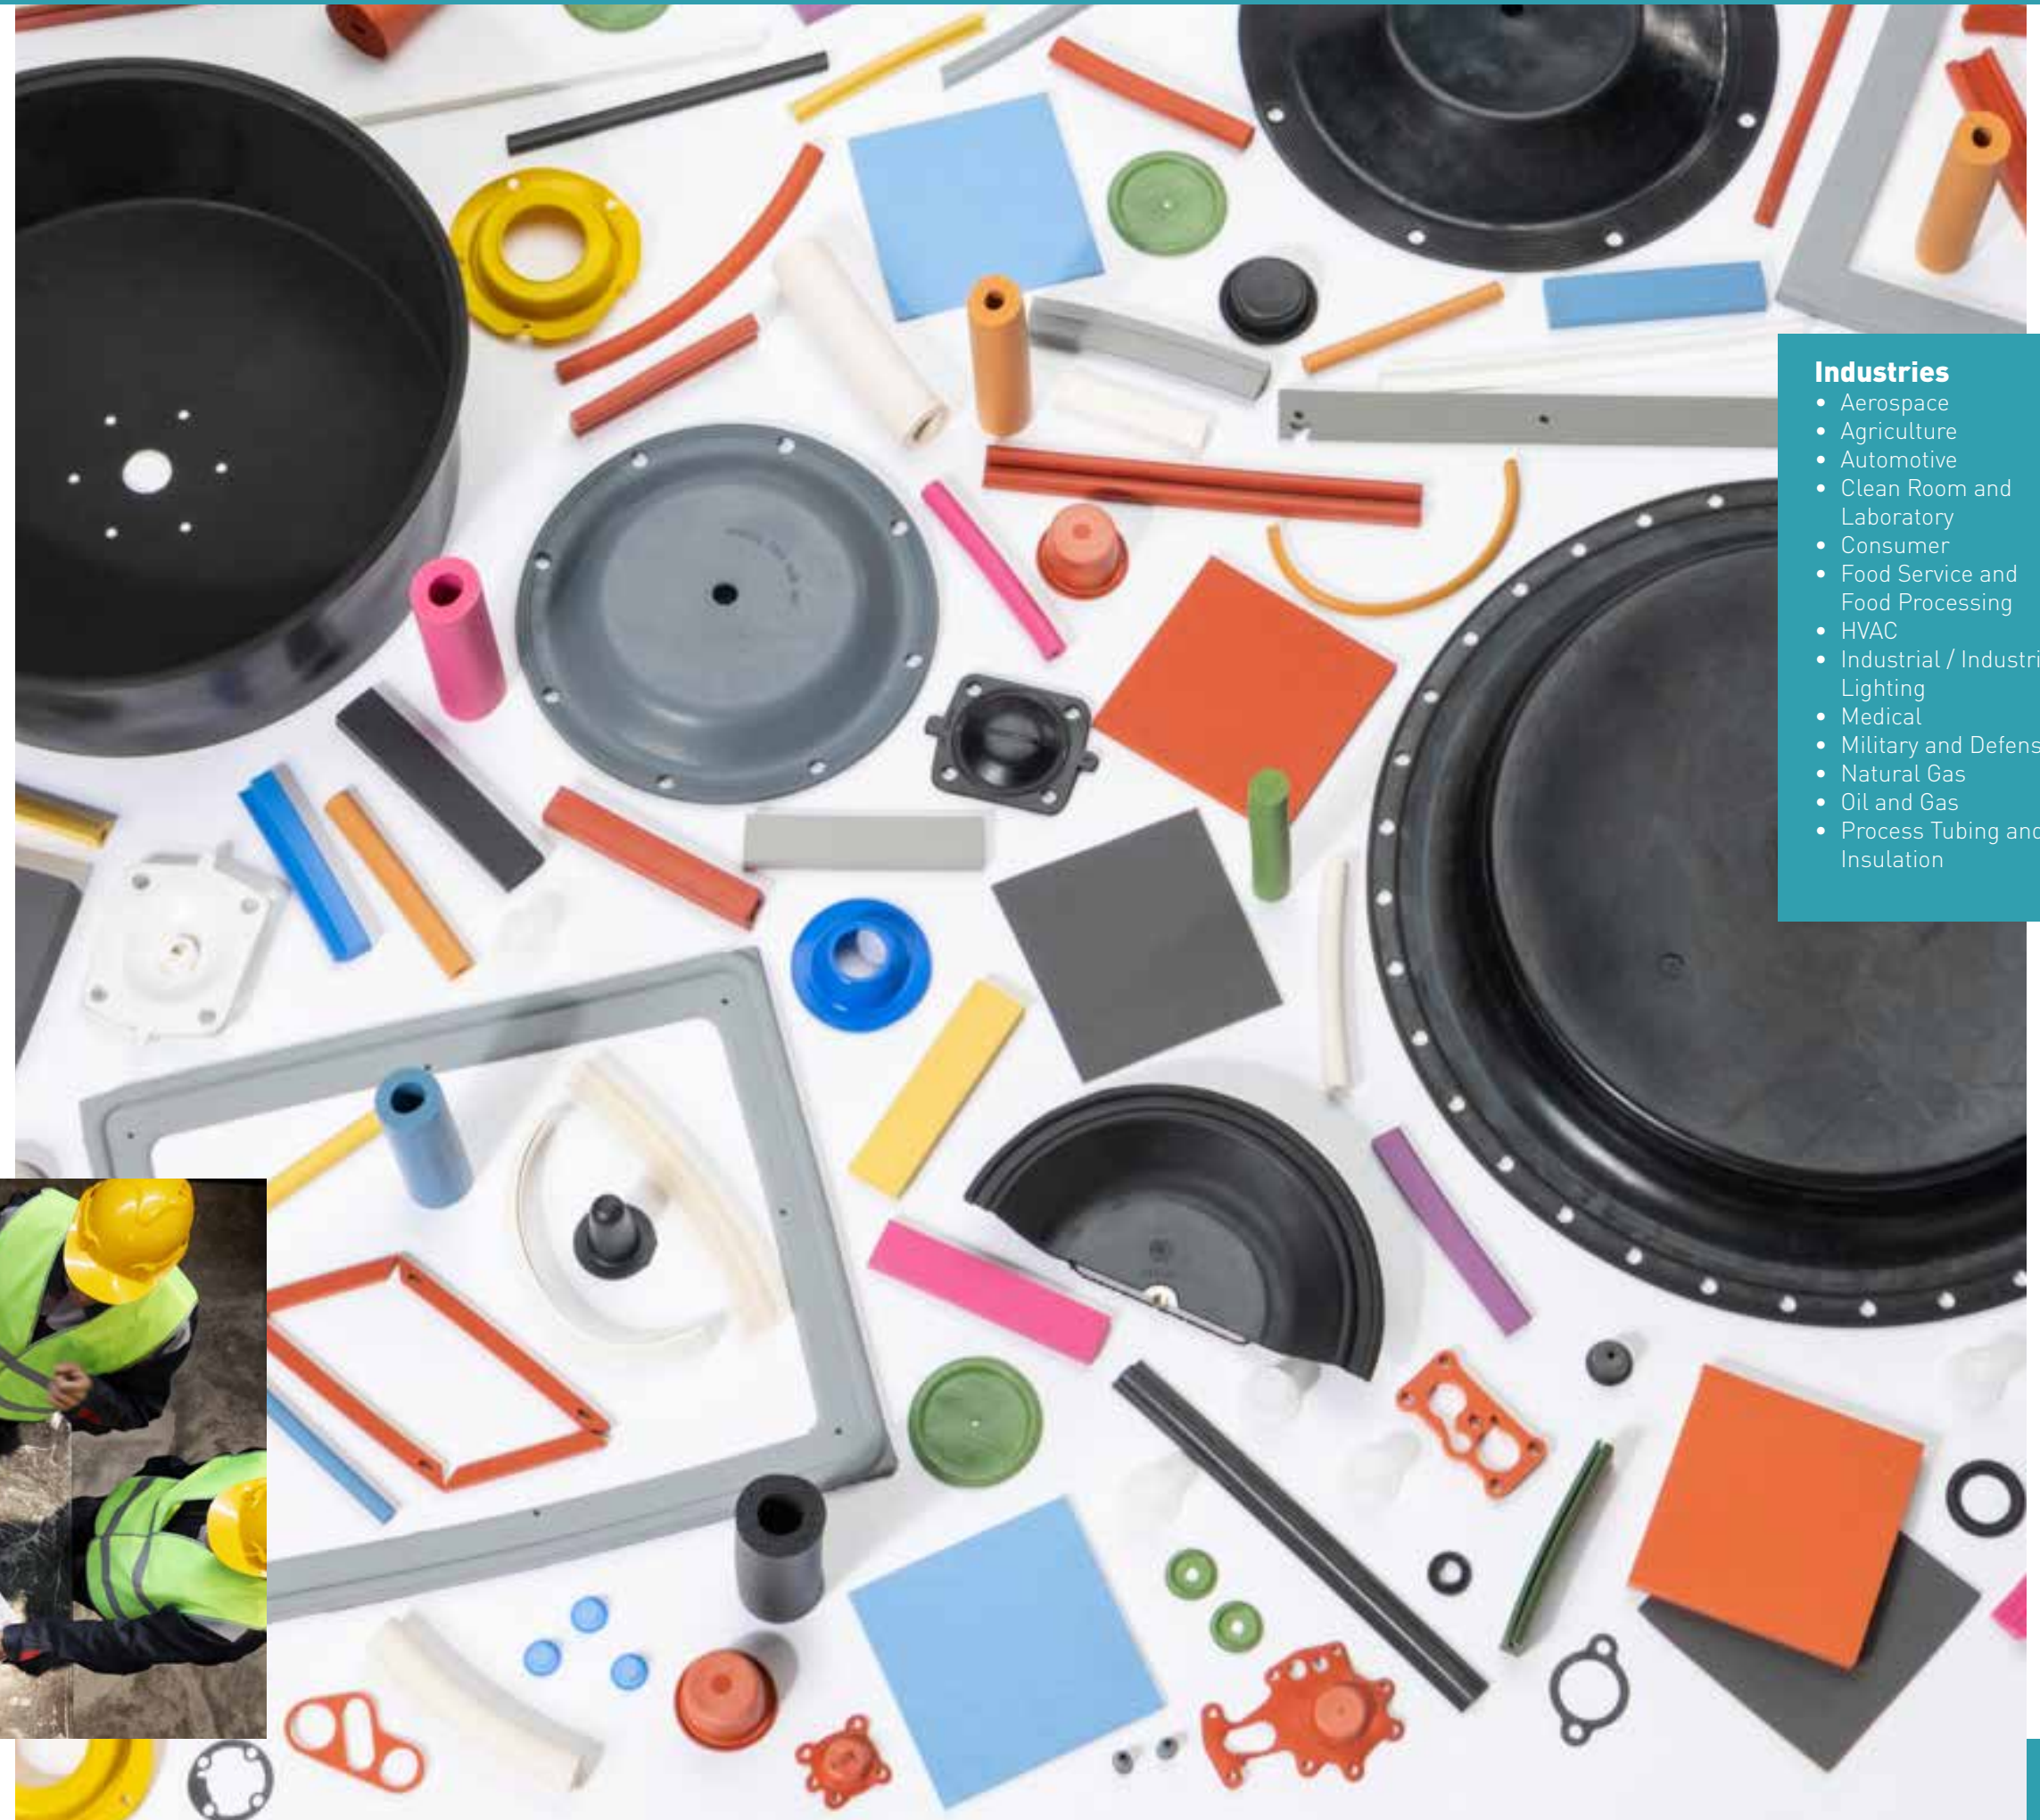

We are a global leading supplier of closed cell silicone sponge and the only source for closed cell silicone sponge sheets skived from buns. It offers bulk extrusion footage, bulk sheet products, and small to medium runs.

Products

- Closed Cell Silicone Sponge
- Dense (Solid Silicone)
- Sheeting
- Synthetic Molded

It was designed and invented by American Ingenuity and to this day is still made with pride in the USA.

Industries

- Aerospace
- Agriculture
- Automotive
- Clean Room and Laboratory
- Consumer
- Food Service and Food Processing
- HVAC
- Industrial / Industrial Lighting
- Medical
- Military and Defense
- Natural Gas
- Oil and Gas
- Process Tubing and Insulation

MARSHMEDICAL™

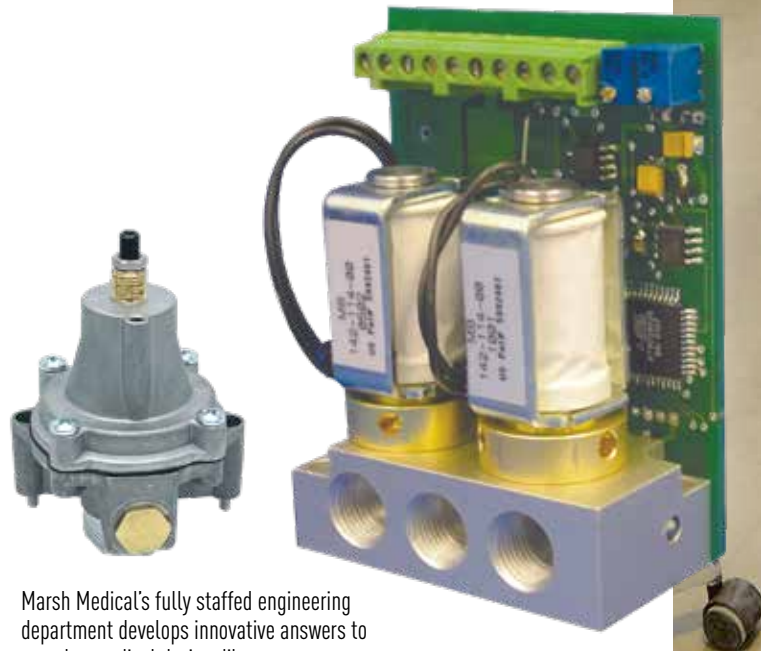

For more than four decades, we've helped power critical medical devices. What we learned during the COVID-19 pandemic, and the strategic connections we forged, prompted us to develop a better way of supplying medical device manufacturers. Now, we're bringing that experience to market with energy and focus as Marsh Medical. Backed by Marsh Bellofram, a U.S. manufacturer with a history reaching back more than 125 years, Marsh Medical is a modern company with state-of-the-art manufacturing facilities, a fully staffed engineering department, on-staff chemists, and global reach.

Industries

- Healthcare Facilities
- Medical Supply
- Device Manufacturers (OEM)

Products

- Electro-pneumatic Pressure & Flow Controls
- Electronic Timing & Level Controls
- Open Medical Power Supplies
- Pressure & Flow Regulators
- Silicone (Door Seals, Gaskets & Medical Tubing)
- Transducers (Pressure, Temperature, Humidity)
- Custom Solutions

Marsh Medical's fully staffed engineering department develops innovative answers to complex medical device dilemmas.
