

MARSHMEDICAL[™] SOLUTIONS

With decades of expertise in redefining excellence in medical device manufacturing, Marsh Medical is equipped to be your 1-source partner seamlessly overcoming critical challenges and delivering cost-efficient, high-quality, custom solutions for vital healthcare equipment.

CUSTOM SOLUTIONS

- High Flow Pressure Regulators
- Direct Acting Pressure Regulators
- Stainless Steel Pressure Regulators
- Analog Electronic Regulators
- Digital Electronic Flow and Pressure Controls
- Time Delay Relays
- Open Frame Power Supplies
- Transducers for Pressure, Humidity, or Temperature

KEY APPLICATIONS

- Electro-Surgical Devices
- Endoscopic Reprocessors
- Lab Water Purification Systems
- Lab Automation Systems
- Liquid Handling Systems
- Neurodiagnostic Devices
- Sterilizers/Washers/Steam Generators
- Temperature Management Systems
- Ventilators/Anesthesia

WHO WE ARE

A division of Marsh Bellofram, Marsh Medical has been your trusted partner in the medical device sector for over 40 years, specializing in custom solutions for critical healthcare equipment.

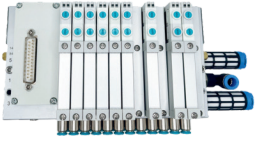

OUR EXPERTISE

We have a global presence, partnering with medical device manufacturers to overcome component challenges in ventilators, sterilizers, anesthesia systems, infusion pumps, etc.

OUR COMMITMENT

We focus on delivering cost-effective solutions without sacrificing quality, ensuring we exceed our partners' expectations through collaboration and open communication.

MD2700 MANIFOLD

The MD2700 Manifold revolutionizes medical pneumatic systems with its configurability, multi-zone pressure support, and durable design, ensuring unparalleled efficiency and adaptability.

- Ventilators
- Anesthesia Systems
- Sterilization
- Medication Dispensing

MD800 SERIES TRANSDUCERS

The MD800 Pressure, Humidity, and Temperature Transducers are built to last, boasting a sleek, compact design crafted from high-grade stainless steel.

- Ventilators
- Anesthesia Systems
- Lab Water Purification
- MRI Systems

MD42 HIGH FLOW PRESSURE REGULATOR

The MD42 combines high flow capacity and precise pressure control in a compact, spring-loaded manual regulator, perfect for space-constrained medical devices.

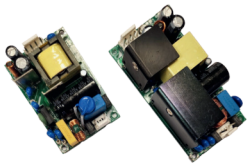

- Regulation of air, oxygen, nitrogen, and inert gases in medical applications

MD95 DIRECT ACTING PRESSURE REGULATOR

The MD95 offers unparalleled reliability in a compact, lightweight design for precise, maintenance-free pressure control in high-pressure, high-temperature environments.

- Regulation of air, water, steam, and inert gases in medical applications

OPEN FRAME POWER SUPPLIES

Marsh Medical Open Frame Power Supplies offer high-quality, customizable power conversion with versatile outputs and mounting options for tailored application needs.

- Ventilators
- Temperature Mgmt.
- Electro-Medical Devices
- Lab Diagnostic Devices

MD72SS STAINLESS STEEL PRESSURE REGULATOR

The MD72SS offers exceptional durability and corrosion resistance in a compact, stainless steel design for precise, adaptable pressure control in medical environments.

- Medical/Bio-Med.
- Sampling Panels
- Pharmaceutical Processing
- Lab Water Purification
