

Pilot Regulator Filters

The PL Pilot Regulators can be adapted to many of the BelGAS pressure regulators. Although most main regulators are in some way modified to accept a pilot regulator operation, the BelGAS Pilot regulators can be used on other pressure regulators designed for the use of a pilot regulator.

In any application where a smaller flow rate due to a smaller orifice, medium filtration is the key to a smooth and trouble free operation of the pilot regulator. Filtration of the pilot supply is always recommended.

P350 Filter Assemblies

Stainless and Aluminum cartridge type filters can be mounted in line before the pilot inlet.
