# WATER / WASTEWATER CONTROL & MONITORING PRODUCTS

Turn to ATC-DEI for process controls and monitoring for water & wastewater applications that help reduce maintenance costs and maximize efficiencies.

Three Phase Monitoring

Voltage Monitoring

Remote Process Monitoring

## ALTERNATING RELAYS & CONTROLLERS

We offer intrinsically safe alternating controllers, as well as alternating relays and motor auto-restart relays. These products are ideal for lift station and pumping applications.

Intrinsically Safe

ARM Series

ARD Series

MAR Series

## TIMER RELAYS

Our timer relays are available with many timing modes - on delay, off delay, and interval are most common. Choose from knob analog dials, DIP switches, and digital for even more precise timing.

175 MD

TD Series

TB Series

## PHASE, VOLTAGE & POWER MONITORS

Our phase monitors provide motor and pump protection. Voltage power monitors show power factor which helps you understand if you are wasting power. Both can help you save time and money.

DPR350C

VCFP96M

## PUMP & LEVEL MONITORING

We offer products for submersible pumps that provide seal failure and over-temperature protection. We also have level controllers that can kick a pump on/off for pump-up and pump-down applications.

SPM Series

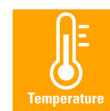

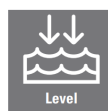

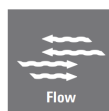

LPC Series

## COST-EFFECTIVE, REMOTE PROCESS MONITORING

# SENSERT™

**NEW!** SENSERT is engineered to monitor sensors in critical processes and provide alerts to the user in numerous environments.
